

# BUILT FOR SPECIAL DISTRICTS & LOCAL GOVERNMENT.

An independent voice for security and public safety.

District Defense Group was created to help special districts and local governments identify risk, strengthen their security posture, and make informed investments that protect their communities and critical infrastructure.

Physical Security • Public Safety • Operational Resilience • Cybersecurity

## CORE SERVICE DISCIPLINES

### Physical Security

Evaluate facilities, infrastructure, and protective systems to identify vulnerabilities and develop layered security strategies.

- Comprehensive physical security assessments
- Video surveillance, access control & intrusion detection
- ALPR, vehicle intelligence & perimeter security
- Security lighting, barriers, gates & facility hardening
- Critical infrastructure protection
- Technology evaluation, vendor selection & implementation oversight

### Operational Security & Resilience

Evaluate how security actually functions across people, processes, policies, technology, and day-to-day operations.

- Operational security & policy/procedure assessments
- Emergency & incident response planning
- Critical asset & infrastructure risk
- Security operations & technology utilization
- Incident reporting, documentation & response protocols
- Security program development & Board-level planning

### Cybersecurity

Provide independent cybersecurity assessment and remediation strategy focused on critical infrastructure and public-sector environments.

- Cybersecurity & vulnerability assessments
- IT / OT, SCADA & industrial control system risk
- Network architecture, remote access & identity review
- Cybersecurity policy, governance & incident readiness
- Remediation strategy, project management & validation

### Public Safety & Law Enforcement Strategy

Help special districts and local governments make better use of crime data, law-enforcement resources, security technology, and contracted patrol programs.

- Crime, incident & ALPR intelligence analysis
- Data-informed patrol strategy & deployment
- Contracted patrol program development
- Law-enforcement coordination & performance reporting
- Independent patrol program oversight

## OUR METHODOLOGY

### 1 ASSESS

Identify vulnerabilities, risks, gaps, and available resources.

### 2 STRATEGIZE

Prioritize findings and develop a practical, defensible plan.

### 3 IMPLEMENT

Coordinate the right resources and drive the plan forward.

### 4 VALIDATE

Measure results, identify needed adjustments, and remain accountable to the Board.

DDG remains the client's advocate throughout the lifecycle — from initial assessment through remediation and long-term program oversight — rather than handing over a report or a predetermined product.

**Independent Assessment • Informed Strategy • Measurable Results**
