1 SEPTEMBER - 3 OCTOBER 2026 · 33 DAYS

PREPARED FOR Special District Board of Directors	JURISDICTION Texas	CLASSIFICATION Confidential	ISSUED 13 October 2026
33 DAYS OBSERVED	85 CONFIRMED IN-DISTRICT CALLS	802 ALPR HOTLIST ALERTS	726,103 ALPR PLATE READS

CONTENTS

I	The District at a Glance	02
II	ALPR Analysis	03
III	Incident Patterns	04
IV	Calls for Service Log	05
V	Observations, Recommended Actions & Methodology	08

Anonymized. The district name, county, responding agencies, street addresses, incident numbers and other identifying details have been removed or generalized. Locations are reported by sector, and recurring addresses are reported by code.

SECTION I

The District at a Glance

33 DAYS OBSERVED	85 IN-DISTRICT CALLS FOR SERVICE	2.6 CALLS PER DAY	802 ALPR ALERTS · ▲ 27%
--	--	---	---

Over the 33-day observation window, 85 calls for service were confirmed to fall within the district boundary, from a screen of every call for service dispatched by the local police department across its jurisdiction. The leading in-district categories were quality of life / disturbance (32) and welfare & mental health (14). ALPR hotlist alerts rose 27% over the prior 30-day window, from 631 to 802.

COMPOSITION OF IN-DISTRICT ACTIVITY · 85 CALLS	KEY FINDINGS
Quality of Life / Disturbance 32 Welfare & Mental Health 14 Property Crime 13 Assault & Violent Crime 11 Traffic / Crash 5 Alarm 5 Other / Miscellaneous 3 Assist & Found Property 2	✓ 37.6% of calls were quality of life or disturbance related, the largest single driver of police activity in the district. ✓ 17 calls (20.0%) came from just 6 recurring addresses. One address generated 5 family-disturbance and assault calls in four days. ✓ 9 vehicle-related property crimes, including 7 auto thefts. 3 of the auto thefts occurred on a single residential street within six days. ✓ 37 calls (43.5%) fell on Fridays and Saturdays; 31 (36.5%) occurred between 20:00 and 04:00. ✓ ALPR: 802 hotlist alerts from 726,103 plate reads. Outside-agency and agency-owned hotlists account for 97.5% of alerts.

Figures reflect dispatch-level call types from the local police department's calls-for-service data for 1 September – 3 October 2026, each call tested against the district's boundary. Calls without coordinates could not be placed and are excluded. Calls dispatched by contract patrol are a separate series and are not included in these counts. A contract patrol log was not provided for this period and is omitted.

SECTION II

ALPR Analysis

Automated license plate recognition (ALPR) cameras in the district read passing license plates and check it against law enforcement hotlists. This section reviews system volume, hotlist alert activity and how the alerts relate to the calls for service in Section I.

HOTLIST ALERTS · 30-DAY COMPARISON

631

PREVIOUS 30 DAYS

802

CURRENT 30 DAYS

▲ 27% INCREASE · +171 ALERTS

726,103

TOTAL PLATE READS

158,710

UNIQUE PLATES

24,203

READS PER DAY

4.6

READS PER UNIQUE PLATE

HOTLIST ALERTS · 30-DAY BREAKDOWN

● Outside Agency Hotlist	493	61.5%
● Agency-Owned Hotlist	289	36.0%
● Protection Order	9	1.1%
● Sex Offender	5	0.6%
● Stolen Plate	3	0.4%
● Stolen Vehicle	3	0.4%

SYSTEM EFFICIENCY

- ✓ **1 alert per 905 reads** (0.11% of all reads). The system is screening heavily and alerting selectively.
- ✓ **21.9% of reads are unique plates.** On average each plate passed a camera 4.6 times, which points to a large share of repeat local traffic.
- ✓ **26.7 alerts per day**, compared with 21.0 per day in the previous window.

CROSS-REFERENCE WITH CALLS FOR SERVICE

- ✓ **6 stolen vehicle / stolen plate alerts** against **7 auto theft calls** in the district. Each auto theft should be checked against ALPR reads for the reported plate.
- ✓ **9 protection order** and **5 sex offender** alerts are a small share of volume but carry the highest consequence and warrant individual follow-up.
- ✓ The auto theft cluster on one residential street (Section III) is a candidate for a targeted ALPR read review around each reported time.

KEY TAKEAWAY

Hotlist alerts rose 27% while 97.5% of alerts come from outside-agency and agency-owned hotlists. The district's question is not volume but outcome: how many alerts led to a stop, a recovery or an arrest. DDG recommends the Board request alert-to-outcome reporting from the responding agency.

ALPR figures reflect the district's ALPR system for its most recent 30-day reporting window and the 30 days before it. Hotlist categories are as labeled by the system. Read volume includes repeat reads of the same plate.

SECTION III

Incident Patterns

RECURRING LOCATIONS · ADDRESSES WITH MORE THAN ONE CALL			
CODE	SECTOR	CALLS	CALL TYPES
R-1	B	5	Assault, Disturbance
R-2	A	3	Suspicious person, Suspicious vehicle
R-3	A	3	Missing, Suspicious event
R-4	B	2	Forgery
R-5	B	2	Assault, Sex assault
R-6	A	2	Loud noise

6 addresses account for 17 of 85 calls (20.0%). Recurring locations are where coordinated follow-up between the district, the responding agency and contract patrol has the most effect. Addresses are withheld and held by DDG.

85	3 OCT · 17:51	Trespasser, prowler	Quality of Life / Disturbance	A	—

85 calls for service geolocated within the district boundary, 1 September – 3 October 2026. Street addresses and incident numbers are withheld. Classifications are reproduced as dispatched, with abbreviations expanded.

SECTION V

Observations & Recommended Actions

RECOMMENDED ACTIONS FOR THE BOARD

- 1. Recurring locations.** Review R-1 through R-3 with the responding agency and contract patrol. Together they produced 11 calls, including repeated family disturbances, an assault and 2 urgent missing-juvenile calls at a single address.
- 2. Vehicle crime.** Cross-check each auto theft against ALPR reads for the reported plate, and review read data on the Sector A street where 3 thefts were reported in six days.
- 3. ALPR outcomes.** Request alert-to-outcome reporting (stops, recoveries, arrests) so the Board can measure what the 27% increase in alerts produced.
- 4. Patrol timing.** Align contract patrol hours with the Friday and Saturday evening and overnight periods, which carried 43.5% and 36.5% of calls respectively.
- 5. Contract patrol log.** Provide the contract patrol log for the next period so patrol activity can be reported alongside police calls for service.

METHODOLOGY

Calls for service. Every call dispatched by the local police department across its jurisdiction for the period was screened, and each call's coordinates were tested against the district's boundary polygon. Only calls inside the boundary are carried. Calls without coordinates are excluded.

Categories. Dispatch call types are grouped into eight categories for Board reporting.

ALPR. Read and alert counts are taken from the district's ALPR system for its most recent 30-day window and compared with the preceding 30 days.

ANONYMIZATION

This sample has been anonymized for public use. The district name, county, responding agencies, contract patrol provider, street addresses, ZIP codes and incident numbers have been removed.

Locations are reported by sector. Addresses with more than one call are reported by code (R-1, R-2...). Dates, times and call classifications are retained so the analysis can be followed.
